

Enjoy the Fun But Don't Let Germs Hitch a Ride Home.

Even cute, healthy, well-cared for animals can carry germs that can make people sick.

DEPARTMENT
OF HEALTH

Germs spread by touching animals or their environments.

Wash your hands with soap and water after visiting animals.

Hand sanitizer does not kill all germs.

Do not eat or drink around animals.

Remove your shoes and change into clean clothes when you get home.
Germs can come home on what we wear.
